

Module 6 Thinking skills and Graphic Organizers Debbie Draper

This was a very interesting reading. It certainly gave me lots to think about regarding extending my activities and also how to close activities. Not all graphic organizers are applicable to three year olds but certainly some of them can be modified. It also got me thinking about how I can use graphic organizers in a concrete manner, i.e hoops to sort items, pictures to compare and contrast, I can scribe the children's explanations etc.
